

## HOW TO IMPORT TAGS AND LAYERS PRESET FOR BLAZE DEMOS

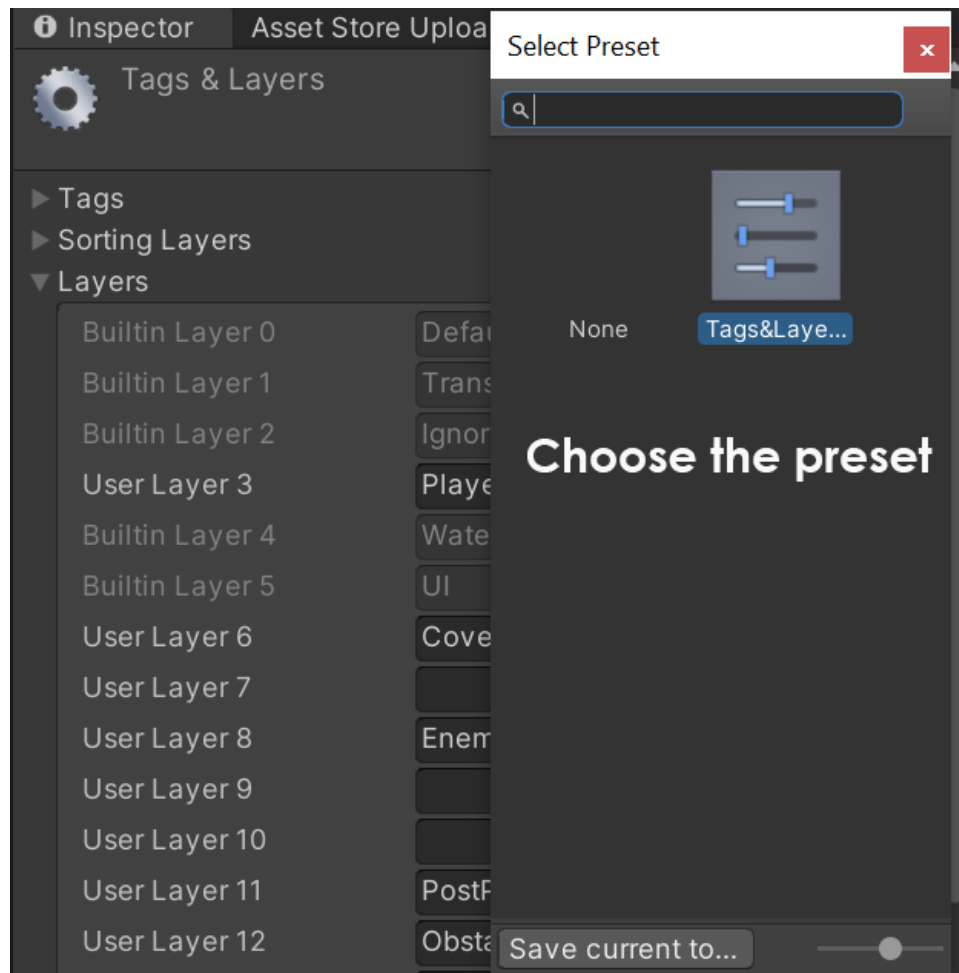

**First step:** select any game object in the scene and add layer.

**Second step:** click on the high-lighted sliders icon in the middle.

**Third step:** a dialogue will appear prompting you to select a preset. Choose Tags & Layers that come with Blaze.

**That's it! You'll find that the layers have been added. Now you can run the demos normally and everything will work perfectly fine.**
